

IN THE CLAIMS

Claim 1 (Currently Amended): A collapsible feeder for birds and small rodents, comprising:

a collapsible feeder body, selectively movable between collapsed and extended positions, having upper and lower ends, comprising a base and a rim, a series of hollow body segments of graduated diameters which are extendible to form a feeder body, the segment of smallest diameter being joined to said base, the other segments being collapsible around the segment of smallest diameter inwardly of said rim;

the segment of smallest diameter having feed outlets formed therein whereby feed in the feeder body may pass outwardly through said feed outlets onto said base inwardly of said rim;

a hanger pivotally secured to the segment of greatest diameter; and

each of said feeder segments including a selective locking structure thereon;

said selective locking structure yieldably maintaining said feeder body in its said extended position;

said body segments being annular-shaped.
